

Takumi
BBQ

Case Study

Takumi BBQ and Ramen is a friendly neighbourhood restaurant that offers an authentic Japanese barbecue experience. It allows its patrons to sit around a table with a BBQ grill right in the centre. With a selection of different thinly sliced cuts of meat, its diners can enjoy a variety of bite-sized and shareable options in a fun and casual setting.

When Takumi moved into their new space in Mississauga, ON, they experienced frequent fire alarm system failures that urgently needed servicing. Our partners at FSS Canada were commissioned to fix the issue. Upon inspection, they realized that the failing system needed to be replaced. The system itself, however, was obsolete and no longer met code requirements. As a result, they were able to position Maple Armor as the ideal solution for its innovative and cost-effective products.

The new fire alarm system now includes Maple Armor's flagship FW106 control panel; the FW721 pull stations; the FW962 horn/strobes; and required the FW811 input module.

We are pleased to hear that the installation and verification was done smoothly. The system has been up and running flawlessly.

About Maple Armor

Founded in Montreal, QC in 2011, Maple Armor designs and manufactures addressable fire alarm systems. We're excited to provide high quality and cost effective options, with the reliability of Canadian engineering. We work closely with our clients to develop our products because we know how important it is to meet their individual needs. We're very proud that the work we do protects lives every day, and that passion for our industry is what drives us to maintain the highest level of quality and reliability.
