

# The Path of the Peaks

# Case Study

The Sentier des cimes (Path of the Peaks) is built on the former site of a heritage fish farm near Saint-Faustin-Lac-Carré and Mont Blanc in the Laurentians north of Montreal.

The highlight of the Laurentian Peaks Trail, which opened in July 2022, is its 40-meter high panoramic tower, the equivalent of a dozen stories. The tower is characterized by the installation of a net in its center for the most daring. At the top, you have a view of the magnificent landscapes typical of the Laurentians, including Mont Blanc and Mont Tremblant in the distance. The trail offers a one kilometer long forest trail that starts at the Welcome Center.

The site is secured by a **Maple Armor** FireWatcher FW106S series networked fire alarm system, the first control panel of which handles the fire safety of the building at the Welcome Centre. There is also a second control panel located at the base of the 40-meter high Peak Tower that provides fire detection for the electrical room and audible fire signals throughout the tower itself.

## About Maple Armor

Founded in Montreal, QC in 2011, Maple Armor designs and manufactures addressable fire alarm systems. We're excited to provide high quality and cost effective options, with the reliability of Canadian engineering. We work closely with our clients to develop our products because we know how important it is to meet their individual needs. We're very proud that the work we do protects lives every day, and that passion for our industry is what drives us to maintain the highest level of quality and reliability.
